PERIODICALS RECEIVED IN LOUISIANA BRANCH LIBRARY

"Thomas Edison used to say ... technical workers did not read widely enough for their own good. He himself read dozens of serious periodicals from all over the world, whereas the average technician probably reads only one or two periodicals regularly, aside from the ephemeral dailies and light weeklies that most people glance at." From Personality and English in Technical Personnel, by P. B. McDonald.

This is a list of periodicals available for regular routing from your Branch Library. Select those that you wish to see and submit your requests on 3 x 5 slips (not AD-245) with title of periodical at top of slip, and your name, agency, and address below - one title to a slip. Please do not submit requests for periodicals you are already receiving.

In making your selections, please keep these points in mind:

1. Selection of titles should be limited to those most important and necessary for regular scanning in connection with official work.
2. Requests by an individual should be limited to the number which he can conveniently read within the three day time limit.
3. The Bibliography of Agriculture may be used to help locate articles in specific fields of interest and thus eliminate time spent in scanning many periodicals.

A periodical may be kept for three days and must then be sent to the next office on the routing slip. Date and initial before re-mailing.

PERIODICALS RECEIVED IN LOUISIANA BRANCH LIBRARY

This is a list of periodicals available for regular routing from your Branch Library. Look it over.

Do you receive the periodicals you need in your work, or are you receiving some you can do without?

In making your selections and revisions, please keep these points in mind:

1. Selection of titles should be limited to those most important and necessary for regular scanning in connection with official work.

We do not have the money to subscribe for all the periodicals we need in the library, or for as many copies as desirable of those we do take. So if a periodical is not going to help you in some way in your work, American Photography, for example, please do not ask for it.

2. The Bibliography of Agriculture may be used to help locate articles in specific fields of interest and thus eliminate time spent in scanning many periodicals.

Submit requests for periodicals you wish to see (new titles only) on plain 3 x 5 slips (not Form AD-245) with title of periodical at top of slip and your name, agency, and address below - one title to a slip. PLEASE DO NOT SUBMIT REQUESTS FOR PERIODICALS YOU ARE ALREADY RECEIVING FROM THE LIBRARY. If you wish to drop several titles, all those titles may be put on one slip.

A periodical may be kept for three days and must then be sent to the next office on the routing slip. Date and initial slip before mailing. Remember that our circulation lists are frequently long and that a periodical may be rather old before it reaches you. You can help this situation by reading magazines and sending them along to the next person promptly.

U. S. DEPARTMENT OF AGRICULTURE
LIBRARY; LOUISIANA BRANCH
702 LOWICH BUILDING.
2026 ST. CHARLES AVENUE
NEW ORLEANS 13, LOUISIANA

PERIODICALS RECEIVED IN LOUISIANA BRANCH LIBRARY

This is a list of periodicals available for regular routing from your Branch Library. Look it over.

Do you receive the periodicals you need in your work, or are you receiving some you can do without?

In making your selections and revisions, please keep these points in mind:

1. Selection of titles should be limited to those most important and necessary for regular scanning in connection with official work.

We do not have the money to subscribe for all the periodicals we need in the library, or for as many copies as desirable of those we do take. So if a periodical is not going to help you in some way in your work, please do not ask for it.

2. The Bibliography of Agriculture may be used to help locate articles in specific fields of interest and thus eliminate time spent in scanning many periodicals.

Submit requests for periodicals you wish to see on plain 3 x 5 slips (not Form AD-245) with title of periodical at top of slip and your name, agency, and address below - one title to a slip. PLEASE DO NOT SUBMIT REQUESTS FOR PERIODICALS YOU ARE ALREADY RECEIVING FROM THE LIBRARY. If you wish to drop several titles, all those titles may be put on one slip.

A periodical may be kept for three days and must then be sent to the next office on the routing slip. Cancel name and date slip before mailing. Remember that our circulation lists are frequently long and that a periodical may be rather old before it reaches you. You can help this situation by reading magazines and sending them along to the next person promptly.

ARE YOU USING THE OTHER SERVICES PROVIDED BY YOUR LIBRARY?

Do you use the guides to help you know what to ask for? The Bibliography of Agriculture is arranged in subject sections so you can check the subjects of special interest to you each month. Get the Bibliography regularly from the library and ask us for the items you wish to see. The Library Newsletter comes to your office each month and lists new books and bulletins received in the Branch Library, along with older publications sometimes. It is good to keep these on file for future reference. Lists of publications on any subject connected with your work will be sent to you upon request. You may ask us for books and bulletins reviewed or announced in the journals you read. If we do not have them, we shall try to borrow them for you.

Make your requests on Form AD-245 which you can secure from your supply center.

Do you need information not available in your office? Ask the library.

Among requests we have had lately were: verify 96 literature citations for an article, chemical use of cotton burs, study of man work units in agriculture, 1950 population of Wharton County, Texas, (1950 census reports for agriculture and population are coming in now), history of Mennonites, castor bean culture, author and publisher of a book, duration of the glacial periods, a list of references on poisonous plants published in last three years. We are glad to try to find the answers to your questions. Sometimes we fail, but we always try and we go to sources outside our own library when that fails to provide the answer.

Did you know you could have deposit collections or book-of-the-month books sent to your office? Books on your designated subject interests and books of general interest in the fields of agriculture and related subjects will be sent upon request--a deposit collection of three books for a six week period or a book each month. Maybe you need to do some reading on some subject such as farm economics, rural sociology, statistics, botany, soils, entomology.
